

IVAN SELYUTIN

UNITY DEVELOPER

5+YEARSEXPERIENCE

Telegram LinkedIn ivansel.job@outlook.com

SUMMARY

Unity Developer with 5+ years of commercial experience developing casual, midcore, and hardcore games for mobile platforms and PC. Experienced in cross-functional teams of 4–60 people, including leading small sub-teams as a feature owner and contributing to technical decision-making and system design.
Designed and implemented scalable gameplay and meta-progression systems, developed internal tools, and optimized performance-critical components across production projects, covering the full development cycle from prototyping to release and LiveOps support.
Specialized in high-performance C# and Unity development, with a focus on game and rendering pipelines, multithreading, shader development, and data-oriented design, consistently delivering robust systems and measurable improvements in performance and stability.

WORK EXPERIENCE

Madame Cyclone

Mar 2025 – April 2026

OMUT– PC, Action

Designed and implemented complex boss AI systems and combat mechanics, including state machines and attack behaviors

- Developed gameplay systems for boss encounters, focusing on responsiveness, balance, and player experience
- Built internal tools to accelerate iteration of gameplay content and improve designer workflows
- Identified and resolved performance bottlenecks in CPU/GPU-intensive scenarios
- Collaborated closely with designers to refine combat systems and overall gameplay pacing
- Implemented shaders and rendering features to support boss mechanics and enhance visual feedback during combat
- Developed interactive environment systems and integrated audio pipelines, including tools and services for efficient sound effect implementation

Sociaro

Dec 2024 – June 2025

Zen Tiles: Match & Relax, Wordlords – Mobile, LiveOps

Designed and implemented scalable meta systems, including progression, events, and monetization, supporting live-service lifecycle

- Owned core gameplay and LiveOps features, contributing to player retention and engagement
- Integrated analytics (Firebase, Unity Analytics) to support data-driven balancing and feature iteration
- Optimized performance and memory usage on mobile devices, ensuring stability across a wide range of hardware

Gear Games

Feb 2022 – Oct 2024

War Legends, Art of War 3 – Mobile, RTS, Multiplayer

Designed and implemented core gameplay systems for RTS mechanics, including unit behavior, abilities, and combat logic

- Contributed to multiplayer systems, focusing on synchronization, session stability, and gameplay consistency
- Developed automated and integration tests, improving regression stability and reducing release risks
- Optimized gameplay systems for large-scale battles, reducing runtime overhead and improving performance
- Participated in feature design and technical discussions within a cross-functional team

Azon Games

Mar 2020– Feb 2022

Vlad and Niki Cars, Vlad and Niki Animal Games, Vlad and Niki PlayDough Cars – Mobile, Children's

Delivered gameplay features across multiple mobile projects (puzzle, racing, adventure), supporting production and release cycles

- Implemented monetization systems (ads, rewarded video), contributing to revenue generation
- Integrated analytics systems to track user behavior and support balancing decisions
- Developed custom Unity Editor tools, improving team productivity and content iteration speed
- Supported live projects post-release, including bug fixing and feature updates

---

SKILLS

- Unity & C#: Unity, C#, UniTask, UniRx, Addressables, DOTS (ECS), UI Toolkit
- Multiplayer & Backend: Photon Fusion, Mirror, Client-Server Architecture, Firebase
- Architecture & Patterns: OOP, SOLID, ECS, Design Patterns, MVVM, MVP
- Tools & Frameworks: Zenject, VContainer, Odin Inspector, DOTween
- Performance: Profiling, Optimization, Memory Management
- Other: Git, SQL, AdMob, Adjust, AppLovin
- Platforms: PC, Android, iOS

EDUCATION

Tula State University | 2018-2022

Bachelor of Mechatronics and Robotics Engineering

Tula State University | 2022-2024

Master's degree in Systems Control and Navigation
