Letter of Recommendation for Ivan Selyutin

This letter confirms that Ivan Selyutin worked at LLC "MADAME CYCLONE" as a Gameplay/Tools Programmer from January 10, 2024 to May 1, 2025.

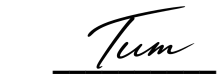

During his work on our 2D Narrative Boss Battle Action project, Ivan made a significant contribution to the team's success:

- **Gameplay and content** – implemented 10 character upgrades and eight unique boss fights with modular AI.
- **Tools for designers** – built additional tooling for game design and narrative design.
- **Wwise technical integration** – helped resolve engine integration issues and extended related Unity functionality.
- **Code standards** – followed the architecture established by the senior programmer.
- **Team collaboration** – responded quickly to designers and artists, always prioritizing project goals and deadlines.

Ivan has proven himself to be a responsible, proactive, and technically strong specialist. He can quickly propose solutions, communicate his ideas clearly, and deliver work end-to-end without sacrificing quality. We are confident that his experience and professionalism will be a valuable asset to any game studio.

We are happy to provide additional information upon request.

Sincerely,

/ CEO
