Letter of Recommendation for Ivan Leonidovich Selyutin (07.07.2000)

who worked with us as a Unity Developer from December 22, 2024 to May 28, 2025.

Ivan worked on the multiplayer prototype "Devil's Bar". His responsibilities included full prototype development, timeline estimation, testing, maintaining code quality, and shaping the project architecture. He took part in building internal company processes and closely collaborated with other departments.

During his time with us, Ivan demonstrated excellent programming skills. He proved to be a strong team player, showed a creative approach to routine tasks, reliability, and excellent communication skills.

I can say with confidence that Ivan is a talented and hardworking specialist who will be a valuable addition to any company.
